## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-24, drawn to a heat treatment apparatus, classified in class 219, subclass 390
  - II. Claims 25-200, drawn to a method of manufacturing a semiconductor device, classified in class 438 subclass 96

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, invention I can be used to practice another process such as inducing a chemical reaction in the tube.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A: Semiconductor device as depicted in Figure 18A;

Species B: Semiconductor device as depicted in Figure 18B;

Species C: Semiconductor device as depicted in Figure 18C;

Species D: Semiconductor device as depicted in Figure 18D;

Species E: Semiconductor device as depicted in Figure 18E;  
Species F: Semiconductor device as depicted in Figure 18F;  
Species G: Semiconductor device as depicted in Figure 19A;  
Species H: Semiconductor device as depicted in Figure 19B;  
Species I: Semiconductor device as depicted in Figure 19C;  
Species J: Semiconductor device as a game, not depicted;  
Species B: Semiconductor device as a car navigation system, not depicted;  
Species B: Semiconductor device as a portable information terminal, not depicted .

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. A telephone call was made to Mr. Eric Robinson on 9/24/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
